P R E F A C E.

WHEN MAN came first out of the Hands of the Great Creator, cloath'd in Body as well as in Soul, with Immortality and Incorruption, there was no Place for Physick, or the Art of Healing. As he knew no Sin, so he knew no Pain, no Sicknes, Weaknes, or Bodily Disorder. The Habitation wherein the Angelick Mind, the *Divinae Particulae* abode, although originally form'd out of the Dust of the Earth, was liable to no Decay. It had no Seeds of Corruption or Dissolution within itself. And there was nothing without to injure it. Heaven and Earth and all the Hosts of them were mild, benign and friendly to Human Nature. The entire Cre-

ation was at Peace with Man, so long as Man was at Peace with his Creator. So that well might the Morning Stars sing together, and all the Sons of God shout for Joy.

2. But since Man rebell'd against the Sovereign of Heaven and Earth, how entirely is the Scene changed? The Incorruptible Frame hath put on Corruption, the Immortal, has put on Mortality. The Seeds of Weakness and Pain, of Sicknes and Death, are now lodged in our inmost Substance: Whence a thousand Disorders continually spring, even without the Aid of External Violence. And how is the Number of these increased, by every Thing round about us? The Heavens, the Earth and all Things contain'd therein, conspire to punish the Rebels against their Creator. The Sun and Moon shed unwholsome Influences from above; the Earth exhales poisonous Damps from beneath. The Beasts of the Field, the Birds of the Air, the Fishes of the Sea, are in a State of Hostility. The Air itself that surrounds us on every Side, is replete with the Shafts of Death. Yea, the Food we eat, daily lays the Foundation of the Life,

Life, which cannot be sustain'd without it. So has the LORD of All secured the Execution of his Decree, "Dust thou art, and unto Dust shalt thou return."

3. BUT can there nothing be found to lessen those Inconveniences, which cannot be wholly removed? to soften the Evils of Life, and prevent in Part the Sickness and Pain to which we are continually exposed? Without Question there may. One Grand Preventive of Pain and Sickness of various Kinds, seems intimated by the Great Author of Nature, in the very Sentence that intails Death upon us: "In the Sweat of thy Face shalt thou eat Bread, 'till thou return to the Ground." The Power of Exercise both to preserve and restore Health, is greater than can well be conceiv'd: Especially in those who add Temperance thereto; who if they do not confine themselves altogether to eat either "Bread or the Herb of the Field," (which God does not require them to do) yet steadily observe both that Kind and Measure of Food, which Experience shews to be most friendly to Health and Strength.

4. 'Tis probable **PHYSICK**, as well as **RELIGION**, was in the first Ages chiefly traditional: Every Father delivering down to his Sons, what he had himself in like Manner receiv'd, concerning the Manner of Healing both Outward Hurts, and the Diseases incident to each Climate, and the Medicines which were of the greatest Efficacy, for the Cure of each Disorder. 'Tis certain, this is the Method wherein the Art of Healing is preserv'd among the *Americans* to this Day. Their Diseases indeed are exceeding few; nor do they frequently occur, by reason of their Continual Exercise, and ('till of late, Universal) Temperance. But if any is Sick, or bit by a Serpent, or torn by a wild Beast, the Fathers immediately tell their Children, what Remedy to apply. And 'tis rare, that the Patient suffers long; those Medicines being quick, as well as generally, Infallible.

5. HENCE perhaps it was that the Ancients, not only of *Greece* and *Rome*, but even of barbarous Nations, usually assign'd Physick a Divine Original. And indeed it was a natural Thought, That
He

He who had taught it to the very Beasts and Birds, the Cretan Stag, the Egyptian Ibis, cou'd not be wanting to teach Man,

*Sanctius his Animal, mentisque capacius
alta:*

Yea, sometimes, even by those meaner Creatures. For it was easy to infer, "If this will heal that Creature, whose Flesh is nearly the same Texture with mine, then in a parallel Case, it will heal me." The Trial was made. The Cure was wrought. And Experience and Physick grew up together.

6. AND has not the Author of Nature taught us the Use of many other Medicines, by what is vulgarly term'd Accident? Thus One walking some Years since in a Grove of Pines, at a Time when many in the neighbouring Town, were afflicted with a Kind of New Distemper, little Sores in the Inside of the Mouth, a Drop of Natural Gum fell from one of the Trees, on the Book which he was reading. This he took up, and thoughtlessly applied it to
one

one of those fore Places. Finding the Pain immediately cease, he applied it to another, which was also presently healed. The same Remedy he afterwards imparted to others, and it did not fail to heal any that applied it. And doubtless numberless Remedies have been thus casually discovered in every Age and Nation.

7. THUS far Physick was wholly founded on Experiment. The *European*, as well as the *American*, said to his Neighbour, Are you sick? Drink the Juice of this Herb, and your Sickness will be at an End. Are you in a burning Heat? Leap into that River, and then sweat 'till you are well. Has the Snake bitten you? Chew and apply that Root, and the Poison will not hurt you. Thus ancient Men, having a little Experience, join'd with Common Sense, and Common Humanity, cured both themselves and their Neighbours, of most of the Distempers to which every Nation was subject.

8. BUT in Process of Time, Men of a Philosophical Turn, were not satisfied with

with this. They began to enquire, How they might account for these Things? How such Medicines wrought such Effects? They examined the Human Body and all its Parts; the Nature of the Flesh, Veins, Arteries, Nerves; the Structure of the Brain, Heart, Lungs, Stomach, Bowels; with the Springs of the several Animal Functions. They explored the several Kinds of Animal and Mineral, as well as Vegetable Substances. And hence the whole Order of Physick which had obtained to that Time, came gradually to be inverted. Men of Learning began to set Experience aside: to build Physick upon Hypotheses: to form Theories of Diseases and their Cure, and to substitute these in the Place of Experiments.

9. As Theories increased, Simple Medicines were more and more disregarded and disused; 'till in a Course of Years, the greater Part of them were forgotten, at least in the Politer Nations. In the Room of these, abundance of New Ones were introduced, by reasoning, speculative Men; and those more and more difficult to be
ap-

applied, as being more remote from Common Observation. Hence Rules for the Application of these, and Medical Books were immensely multiplied; till at length Physick became an abstruse Science, quite out of the Reach of Ordinary Men.

10. PHYSICIANS now began to be had in Admiration, as Persons who were something more than Human. And Profit attended their Employ as well as Honour; so that they had now Two Weighty Reasons, for keeping the Bulk of Mankind at a Distance, that they might not pry into the Mysteries of the Profession. To this End they increased those Difficulties by Design, which began in a Manner by Accident. They fill'd their Writings with abundance of Technical Terms, utterly unintelligible to plain Men. They affected to deliver their Rules, and to reason upon them, in an abstruse, and philosophical Manner. They represented the Critical Knowledge of Anatomy, Natural Philosophy (and what not? Some of them insisting on that of Astronomy and Astrology too) as ne-

necessary previous to the understanding the Art of Healing. Those who understood only How to restore the Sick to Health, they branded with the ignominious Name of Empiricks. They introduced into Practice, abundance of Compound Medicines, consisting of so many Ingredients, that it was scarce possible for common People to know, which it was that wrought a Cure: Abundance of Exoticks, neither the Nature nor Names of which their own Countrymen understood: Of Chymicals, such as they neither had Skill, nor Fortune, nor Time, to prepare; yea, and of Dangerous ones, such as they cou'd not use, without hazarding Life, but by the Advice of a Physician. And thus both their Honour and Gain were secured: a vast Majority of Mankind, being utterly cut off from helping either themselves or their Neighbours, or once daring to attempt it.

II. YET there have not been wanting from Time to Time, some Lovers of Mankind, who have endeavoured (even contrary to their own Interest) to reduce Physick to its Antient Standard: Who
have

have laboured to explode out of it all Hypotheses, and fine-spun Theories, and to make it a plain, intelligible Thing as it was in the Beginning: Having no more Mystery in it than this: "Such a Medicine removes such a Pain." These have demonstrably shewn, That neither the Knowledge of Astrology, Astronomy, Natural Philosophy, nor even Anatomy itself, is absolutely necessary to the quick and effectual Cure of most Diseases incident to Human Bodies: Nor yet any Chymical, or Exotick or Compound Medicine, but a single Plant or Fruit duly applied. So that every Man of Common Sense (unless in some rare Cases) may prescribe either to himself or his Neighbour; and may be very secure from doing any Harm, even where he can do no Good.

12. EVEN in the last Age there was something of this Kind done, particularly by the great and good Dr. Sydenham: And in the present, by his Pupil, Dr. Dover, who has pointed out Simple Medicines for many Diseases. And some such may be found in the Writings of the learned and ingenious Dr.

Dr. *Cheyne*: Who doubtless would have communicated many more to the World, but for the Melancholy Reason he gave one of his Friends, that prest him with some Passages in his Works, which too much countenanced the Modern Practice, "O Sir! We must do something to oblige the Faculty, or they will tear us in Pieces."

13. WITHOUT any Regard to this, without any Concern about the obliging or disobliging any Man living, a mean Hand has made here some little Attempt, toward a plain and easy Way of curing most Diseases. I have only consulted herein, Experience, Common Sense, and the Common Intrest of Mankind. And supposing they can be cured this easy Way, who wou'd desire to use any other? Who wou'd not wish to have a Physician always in his House, and one that attends without Fee or Reward? To be able (unless in some few complicated Cases) to prescribe to his Family, as well as himself?

14. IF it be said, But what Need is there of such an Attempt? I answer,

B. The

The greatest that can possibly be conceived. Is it not needful in the highest Degree, to rescue Men from the Jaws of Destruction? From wasting their Fortunes, as Thousands have done, and continue to do daily? From pining away in Sickness and Pain, either through the Ignorance or Knavery of Physicians? Yea, and many Times throwing away their Lives, after their Health, and Time, and Substance?

Is it inquired, But are there not Books enough already, on every Part of the Art of Medicine? Yes, too many, ten times over, considering how little to the Purpose the far greater Part of them speak. But beside this, they are too dear for poor Men to buy, and too hard for plain Men to understand. Do you say, But there are enough of these Collections of Receipts. Where? I have not seen One yet, either in our own or any other Tongue, which contains only Safe and Cheap and Easy Medicines. In all that have yet fallen into my Hands, I find many Dear and many far-fetch'd Medicines; beside many of so Dangerous a Kind, as a prudent Man wou'd never meddle with. And against the
greater

greater Part of those Medicines, there is a further Objection; They consist of too many Ingredients. This Common Method of compounding and decompounding Medicines, can never be reconciled to Common Sense. Experience shews, That One Thing will cure most Disorders, at least as well as Twenty put together. Then why do you add the other Nineteen? Only to swell the Apothecary's Bill: Nay, possibly, on purpose to prolong the Disorder, that the Doctor and he may divide the Spoil.

BUT admitting there is some Quality in the Medicine proposed, which has need to be corrected: Will not One Thing correct it, as well as Twenty? It is probable, much better. And if not, there is a Sufficiency of other Medicines, which need no such Correction.

How often, by thus compounding Medicines of Opposite Qualities, is the Virtue of both utterly destroy'd? Nay, how often do those join'd together destroy Life, which single might have

preserved it? This occasion'd that Caution of the great *Boerhaave*, against mixing Things without evident Necessity, and without full Proof of the Effect they will produce when join'd together, as well as of that they produced when asunder: Seeing (as he observes) several Things, which separately taken, are safe and powerful Medicines, when compounded not only lose their former Powers, but commence a strong and deadly Poison.

15. As to the Manner of using the Medicines here set down, I shou'd advise, as soon as you know your Distemper, (which is very easy, unless in a Complication of Disorders, and then you wou'd do well to apply to a Physician that fears God) First, Use the First of the Remedies for that Disease which occurs in the ensuing Collection; (unless some other of them be easier to be had, and then it may do just as well.) Secondly, After a competent Time, if it takes no Effect, use the Second, the Third, and so on. I have purposely set down (in most Cases several Remedies for each Disorder; Not only because All are not
equally

equally easy to be procured at all Times, and in all Places: But likewise because the Medicine which cures One Man, will not always cure another of the same Distemper. Nor will it cure the same Man at all Times. Therefore it was necessary to have a Variety. However, I have subjoin'd the Letter *I.* to those Medicines, which are said to be infallible. Thirdly, Observe all the Time the greatest Exactness in your Regimen, or Manner of Living. Abstain from all Mixt, all High-season'd Food. Use plain Diet, easy of Digestion: And this as sparingly as you can, consistent with Ease and Strength. Drink only Water, if it agrees with your Stomach; If not, good, clear Small-beer. Use as much Exercise daily, in the open Air, as you can without Weariness. Sup at Six or Seven on the lightest Food: Go to Bed early, and rise betimes. To persevere with Steadiness in this Course, is often more than half the Cure. Above all, add to the rest, (for it is not Labour lost) that Old, Unfashionable Medicine, PRAYER. And have Faith in God, who " killeth and maketh alive, who

“ bringeth down to the Grave and
 “ bringeth up.”

16. For the Sake of those who desire, thro' the Blessing of God to retain the Health which they have recovered, I have added a few plain, easy Rules, chiefly transcribed from Dr. *Cheyne*.

I. 1. THE Air we breathe is of great Consequence to our Health. Those who have been long abroad in Easterly or Northerly Winds, shou'd drink some thin and warm Liquor going to Bed; or a Draught of Toast and Water.

2. Tender People shou'd have those who lie with them or are much about them, sound, sweet and healthy.

3. Every one that wou'd preserve Health, shou'd be as clean and sweet as possible in their Houses, Cloaths and Furniture.

II. 1. THE great Rule of Eating and Drinking is, To suit the Quality and
 Quan-

Quantity of the Food to the Strength of our Digestion: to take always such a Sort and such a Measure of Food, as fits light and easy on the Stomach,

2. All Pickled or Smeak'd or Salted Food, and all high-season'd is unwholesome.

3. Nothing conduces more to Health, than Abstinence and plain Food with due Labour.

4. For studious Persons, about eight Ounces of Animal Food, and twelve of Vegetable in Twenty-four Hours is sufficient.

5. Water is the wholesomest of all Drinks; quickens the Appetite and strengthens the Digestion most.

6. Strong, and more Especially spirituous Liquors, are a certain, tho' slow Poison.

7. Experience shews, there is no Manner of Danger, in leaving them off all at once.

8. Strong

8. Strong Liquors do not prevent the Mischiefs of a Surfeit, nor carry it off so safely as Water.

9. Malt Liquors (except clear Small-beer of a due Age) are exceeding hurtful to tender Persons.

10. Coffee and Tea are extremely hurtful to Persons who have weak Nerves.

III. 1. TENDER Persons should eat very light Suppers; and those, two or three Hours before going to Bed.

2. They ought constantly to go to Bed about Nine, and to rise at Four or Five.

IV. 1. A due Degree of Exercise is indispensably necessary to Health and Long Life.

2. Walking is the Best Exercise for those who are able to bear it, Riding for those who are not. The Open Air, when

when the Weather is fair, contributes much to the Benefit of Exercise.

3. We may strengthen any weak Part of the Body by constant Exercise. Thus the Lungs may be strengthened by loud speaking, or walking up an easy Ascent: The Digestion, and the Nerves by Riding. The Arms or Hams by strong rubbing them daily.

4. The Studious ought to have stated Times for Exercise, at least Two or three Hours a Day: The one Half of this before Dinner, the other, before going to Bed.

5. They shou'd frequently shave, and frequently wash their Feet.

6. Those who read or write much shou'd learn to do it standing: otherwise it will impair their Health.

7. The fewer Cloaths any one uses, by Day or by Night, the hardier he will be.

8. Ex-

8. Exercise, first, shou'd be always on an empty Stomach; Secondly, shou'd never be continued to Weariness: Thirdly, after it, we shou'd take care to cool by Degrees. Otherwise we shall catch Cold.

9. The Flesh-brush is a most useful Exercise, especially to strengthen any Part that is weak.

10. Cold-bathing is of great Advantage to Health. It prevents abundance of Diseases. It promotes Perspiration, helps the Circulation of the Blood, and prevents the Danger of catching Cold. Tender People shou'd pour Water upon the Head before they go in, and walk in swiftly. To jump in with the Head foremost, is too great a Shock to Nature.

V. 1. Costiveness cannot long consist with Health. Therefore Care shou'd be taken to remove it at the beginning: and when it is removed, to prevent

vent its Return, by soft, cool, opening Diet.

2. Obstructed Perspiration (vulgarly called Caching Cold) is one great Source of Diseases. Whenever there appears the least Sign of this, let it be removed by gentle Sweats.

VI. 1. THE Passions have a greater Influence on Health than most People are aware of.

2. All violent and sudden Passions dispose to, or actually throw People into Acute Diseases.

3. The Slow and lasting Passions, such as Grief and hopeless Love, bring on Chronical Diseases.

4. 'Till the Passion which caus'd the Disease is calm'd, Medicine is applied in vain.

5. The Love of God, as it is the Sovereign Remedy of all Miseries, so in particular it effectually prevents all the Bodily

Bodily Disorders the Passions introduce, by keeping the Passions themselves within due Bounds. And by the unspeakable Joy and perfect Calm, Serenity and Tranquility it gives the Mind, it becomes the most powerful of all the Means of Health and Long Life.

C Side

Side which is to be next the Skin full of Holes. Cover this with a thin Linnen, and wear it on the Pit of the Stomach, renewing it two Hours before the Fit:

3. Or, Apply a Handful of *Yarrow* in like Manner:
4. Or, a large *Onion* slit:
5. Or boil *Yarrow* in new Milk, 'till it is tender enough to spread as a Plaster. An Hour before the cold Fit, apply this to the Wrists, and let it be on, 'till the hot Fit is over. If another Fit comes, use a fresh Plaster:
6. Or, spread soft Wax, about the Thickness of a Crown-piece, large enough to cover each Wrist. On this spread the Leaves of the Tops of *Rue*. Let this Plaster lie on your Wrists five or six Days:-
7. Or, split two large Figs, and spread on them *white Alabaster* beaten to Powder. Bind these to the Wrists:
8. Or, drink a Quart of *cold Water*, just before the cold Fit. Then go to Bed and sweat:
9. Or, make six middling Pills, of *Cobwebs*. Take *one* little before the cold

cold Fit: Two a little before the next Fit: The other three, if Need be, a little before the third Fit. I never knew this fail:

10. Or, two Tea-spoonfuls of *Sal Prunellæ* an Hour before the Fit. It commonly cures in thrice taking:

11. Or, from a Dram and Half to two Drams of good *Stone Brimstone* finely powdered: If Need be, repeat it:

12. Or, a Tea-spoonful of *Brimstone* mixt with *Honey*:

13. Or, Eat a *Lemon*, Rind and all:

14. Or, an Ounce of *Juice of Pellitory of Spain*, sweating after it. It cures the second, or third Time of using.

15. Or, a Pint of Decoction of *Camomile* sweetned with *Treacle*. Take it warm in Bed, and sweat two Hours.

☞ It is proper to take a gentle Vomit before you use any of these Medicines.

II. A TERTIAN AGUE

16. Boil a handful of *Ribwort* in Whey. Drink this warm an Hour before the Fit comes, and lie down and sweat:

17. Or, use the *Cold Bath*. But when you use this, on any Account whatever, it is proper,

1. To bleed or purge, before you begin:

2. To go in cool; to immerge at once; to stay in only two or three Minutes, (or less at first.)

3. Never to bathe on a full Stomach:

4. To bathe twice or thrice a Week at least, 'till you have bathed nine or ten Times:

5. To sweat immediately after it (going to Bed) in Palfies, Rickets, and all Diseases wherein the Nerves are obstructed:

6. You may use yourself to it, without any Danger, by beginning in *May*, and at first just plunging in, and coming out immediately. Tho' many have begun in Winter, without any Inconvenience.

III. A QUARTAN AGUE.

18. Apply to the Suture of the Head, when the Fit is coming, *Wall July Flowers* beaten together Leaves and Flow-

Flowers with a little Salt. Keep it on 'till the hot Fit is over. Repeat this, if Need be.

IV. AN ANASARCA, OR FLESH-DROPSY.

19. Apply Green *Dock-leaves* to the Joints, and the Soles of the Feet, changing it once a Day:
20. Or, Fry *Rue* in Oil of *Wall-nuts*, and apply it hot as a Poultis to the Navel, changing it once a Day.

ST. ANTHONY'S FIRE.

21. Take a Pint of *Cold Water* twice a Day:
22. Or, a Glass of *Tar-Water* warm, in Bed, every Hour, washing the Part with the same.
- ✂ *Tar-Water* is made thus. Put a Gallon of Cold Water to a Quart of *Norway Tar*. Stir them together with a flat Stick for five or six Minutes. After it has stood cover'd for three Days, pour off the Water clear, bottle and cork it.
23. Or, take a Decoction of *Elder-leaves*, as a Sweat:

30 *Primitive Physick.*

24 Or, of *Wild Thyme*, applying to the Part a Cloath dipt in *Lime-water*, mixt with a little *camphorated Spirits* of Wine.

☞ *Lime-Water* is made thus. Infuse a Pound of good quick Lime, in a Gallon of Spring Water for twenty-four Hours. Decant and keep it for Use.

25. Or, apply Leaves of *Water-dock*:

26. Or, *Venice Treacle*:

27. Or, wash it with Water wherein Bran is boiled:

28. Or, boil a handful of *Sage*, two handfuls of *Elder-leaves* (or *Bark*) and an Ounce of *Allum* in two Quarts of Forge Water, to a Pint. Anoint with this every Night.

V. The APOPLEXY.

29. To prevent, use the *Cold Bath*, and drink only Water.

30. In the Fit, Blow Powder of *White Hellebore* up the Nose, and fix a *Cupping Glass*, without scarifying, to the Nape of the Neck, and another to each Shoulder.

31. If the Fit be soon after a Meal, do not bleed, but *Vomit*.

VI. The

VI. The ASTHMA.

32. Take a Pint of *Cold Water* Every Night, as you lie down in Bed:
33. Or, a Pint of *Cold Water* every Morning, *washing* the Head therein immediately after, and using the *Cold Bath* once a Fortnight:
34. Or half a Pint of *Tar Water* twice a Day:
35. Or a Spoonful of *Nettle-juice*, mixt with clarified *Honey*:
36. Or, a Tea-spoonful of *Nitre* and as much *Sal Armoniack* in half a Pint of Water:
37. Or, a Spoonful of Syrup of *Garlick* three or four Times a Day:
38. Or, take an Ounce of *Elecampane Roots*, sliced thin, and a Handful of *Ground-ivy-leaves*; boil them in three Pints of Spring Water to a Quart. Strain and sweeten it with *Honey*, and drink a Glasse Morning and Evening.
39. Or, take an Ounce of *Quick-silver* every Morning, and a Spoonfull of the Gas of *Sulphur*, in a large Glass of Spring-Water at Five in the Evening,

ing, and at Bed-time 'till you are well. *I.*

40. For present Relief, Vomit with a Quart or more of *warm Water*. The more you drink of it the better.

☞ Do this whenever you find any Motion to Vomit, and take Care always to keep your Body open.

VII. A Dry, or CONVULSIVE ASTHMA.

41. Use the *Cold Bath* thrice a Week:

42. Or, beat fine *Saffron* small, and take eight or ten Grains every Night:

43. Or, Dry and powder a *Toad*. Make it into small Pills, and take one every Hour 'till the Convulsions cease.

44. In any Asthma, the best Drink is *Apple Water*.

VIII. To cure BALDNESS.

45. Rub the Part Morning and Evening, with *Onions*, 'till it is red; and rub it afterwards with *Honey*.

IX. BLEEDING at the NOSE.

46. Apply to the Neck behind and on each Side, a Cloath dipt in *Cold Water*:

47. Or,

47. Or, hold *Strawberry Root*, or *Cockle Root*, under the Tongue:
48. Or, chew *Nettle Root*, spitting out the Juice:
49. Or, put into the Nose *Betony* stamp't with a little Salt.
50. Or, Steep a *Linnen Rag* in *sharp Vinegar*, burn it, and blow the Ashes up the Nose with a Quill.

52. Or, Leaves of *All-beal* bruised: *I.*
53. Or, Spread the *Ashes* of a Linnen Cloth thick on another Linnen Cloth, and apply it:
54. Or, Strew on it the *Ashes* of a *Linnen Rag*, dipt in *sharp Vinegar* and burnt:
55. Or, *Vine-leaves* dried and powder'd.
56. Or, take ripe *Puff-balls*. Break them warily and save the Powder. Strew this on the Wound and bind it on.

XI. SPITTING BLOOD.

57. Take half a Pint of Stew'd *Prunes*, at lying down for two or three Nights:
58. Or,

58. Or, a Glas of Decoction of *Onions* :
59. Or four Spoonfuls of Juice of *Nettles* every Morning; and a large Cup of Decoction of *Nettles* at Night, for a Week:
60. Or, three Spoonfuls of *Sage-juice* in a little *Honey*. This presently stops either spitting or vomiting Blood:
61. Or, half a Tea-spoonful of *Barbadoes Tar* on a Lump of Loaf Sugar, at Night. (☞ It commonly cures at Once:)
62. Or, a Spoonful of Juice of *Betony* in a Cup of new Milk, for three or four Mornings:
63. Or, half a Pint of Decoction of *St. John's Wort* Morning and Evening:
64. Or, of *Ground-ivy*:
65. Or, of *Horse-tail*: (the Herb.) Or a Dram of the Root powder'd.

XII. VOMITING BLOOD.

66. Take three Spoonfuls of *Sage-juice* in *Honey*:
67. Or two Spoonfuls of *Nettle-juice*. (☞ This also dissolves Blood coagulated in the Stomach.)

68. Or

- 68. Or, one of Juice of *Quinces*:
- 69. Or, a Spoonful of Juice or Syrup of *Horse-tail*:
- 70. Or, a Quarter of a Pint of Decoc-
tion of *Nettles* and *Plantane* two or
three Times a Day.

XIII. To resolve COAGULATED BLOOD.

- 71. Bind on the Part for some Hours a
Paste made of *Black-Soap*, and Crumbs
of *White Bread*:
- 72. Or, grated Root of *Burdock* spread
on a Rag: Renew this twice a Day.

XIV. BOILS.

- 73. Apply a little *Venice Turpentine*.
- 74. Or, a Plaister of *Honey* and *Wheat-
flower*:
- 75. Or, of *Figs*:
- 76. Or, the Leaves of *Arum* or *Wake-
robin*:
- 77. Or, a little *Saffron* in a white-bread
Poultis. 'Tis proper to purge also.

XV. HARD BREASTS.

- 78. *Turnips* roasted 'till soft, then mash'd
and mixt with a little Oil of *Roses*.
Change

Change this twice a Day, keeping the Breast very warm with Flannel.

XVI. SORE BREASTS and SWELL'D.

79. Boil a Handful of *Camomile* and as much *Mallows* in Milk and Water. Foment with it between two Flannels as hot as can be borne every twelve Hours. It also dissolves any Knob; or any swelling in any Part.

XVII. A BRUISE.

80. Immediately apply *Treacle* spread on brown Paper:

81. Or, *clarified Honey*.

XVIII. AN INWARD BRUISE.

82. Drink *Comfrey* Tea Morning and Evening:

83. Or a Plaister of chopt *Parsley* mixt with Butter:

84. Or, a Fomentation of *Verjuice* and *Camomile* Flowers.
